

Overview

The flatbed cutting plotter Secabo FC50 including software is ideally suited for the production of small series and design samples. The compact desktop device offers a maximum working area of 35cm x 52cm and reliably fixes the applied material on a vacuum table. The underlying felt mat allows smooth work even with complete material averages.

As an alternative to the drag knife, there are two groove and groove tools in different sizes. Thus, depending on the paper thickness, the right tool is available to cut out objects with exact contour and to create grooves or folded edges.

The multilingual cutting software DrawCut PRO and the multi-registration mark recognition system LAPOS Q are included in delivery and support professional results. The vacuum pump with acoustic enclosure is already included in delivery, the silencer for noise reduction is optionally available.

Technical Data

interfaces	USB
countour cutting function	LAPOS Q, sequential cut marks
scope of delivery	Flatbed cutting plotter, multilingual cutting software DrawCut PRO (Windows), drag knife, ball-bearing knife holder, plotter, grooving tool in two sizes, connection cable, vacuum pump, felt mat for vacuum table, acoustic enclosure and German user manual.
max. work area	35cm x 52cm
max. thickness	1,5 mm
downforce	50g - 500g g
control	back-illuminated graphic LCD display with gel buttons
Max. cutting speed	600 mm/s
Dimensions (W x D x H)	76cm x 86cm x 30cm
max. grammage	400 g / m ²
weight without packaging	35,00 kg
weight with package	72,00 kg
Brand	Secabo
