

## CRYLUX® NIGHT & DAY

IMPRESSIVE RESULTS – BY DAY AS WELL AS BY NIGHT.

Colour change using the same sheet is possible with CRYLUX® Night & Day.

The sheets are ideal to produce corporate signs in indoor or outdoor applications. Let it stand without light during the day, and it will be a dark sign or corporate letter on top of a roof or in the middle of a façade.

When it is back illuminated at night it will become into an outstanding white letter that is visible to all.

### CHARACTERISTICS

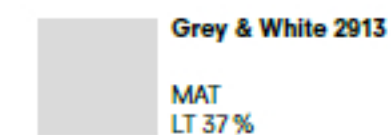

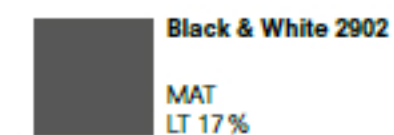

- Changes colour from dark (without back-lighting) to white (with back-lighting)
- Top side is anti-glare and allows even light diffusion through the sheet
- Allows powerful lighting without generating hotspots

### APPLICATIONS

- Signage | Lettering
- Corporate identity
- Lighting

### PROCESSING

- Digital printing | Screen printing
- Laminating
- Painting | Spray painting | Lacquering
