

Fineart Canvas Miro

Art.No. 4443-XXXX-56

description

Fineart Canvas Miro is a polyester blend. It is the most popular canvas for art reproductions. The cotton provides a natural, uneven structure, which makes the print look „more genuine“. The coating is particularly suitable for water-based and latex inks. 18 m rolls are on a 50mm/2“ core. Important: Run a print test! Many factors influence the textile during printing and application. All technical data were determined according to the current state of measurement technology and reflect the values of the measurement sample. Despite the highest quality standards, there may be production deviations – all information are legally non-binding and without guarantee. - Not for sale in the USA -

Main Application

Canvas

Applications

Banner
Canvas Frame / Art Reproduction
Pop-up Displaysystems
Wall covering

Features

Good flatness
No fraying

Fakten

Weight 360 g
